

Calculations Policy 2016-17

The ability to calculate mentally is central to good teaching and learning of mathematics. As children progress through the school they will need to develop ways of recording to support their thinking so that:

'By the end of Y6 children are equipped with mental, written and calculator methods that they can understand and use correctly'

(Primary Framework, Guidance Paper, Calculation)

This draft policy is intended to ensure consistency and progression from mental to written calculations throughout the school. **It is important that such a policy is discussed and agreed upon by the whole staff before it is implemented.**

Teachers should support and guide children through the following important stages:

- talk about mathematics using appropriate vocabulary
- develop the use of pictures, symbols and numerals to record (see Models and Images)
- use jottings to aid mental strategies.
- use an empty number line as a key model to support the teaching and learning of mental calculations.
- use an expanded method which leads to a standard method for each of the four operations.
- know when it is more efficient to use a mental or written method, or a calculator.

It is important that children do not abandon mental methods and jottings once written methods are introduced.

Once agreed the policy should be shared with teaching assistants and parents. It should be regularly reviewed with the whole staff to ensure that the methods are appropriate and being taught consistently. This policy will then become part of the school monitoring system.

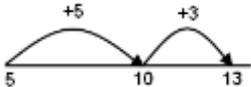

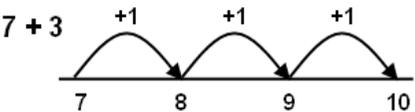

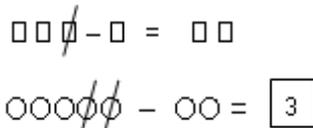

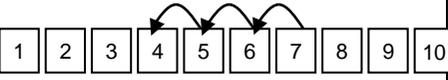

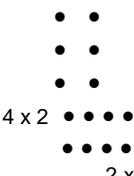

For mathematics to be meaningful children must see the links to real life situations. This means that using and applying newly acquired skills within problem solving and investigative work is essential and should be embedded in most mathematics lessons reflecting the importance of mathematics in everyday life.

Lewisham Primary Mathematics Team July 2009 (Updated for September 2014)

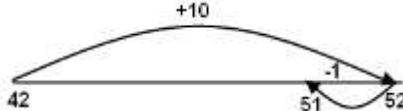

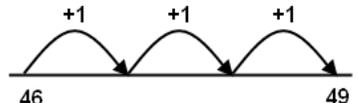

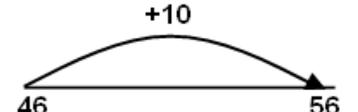

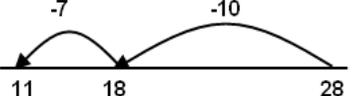

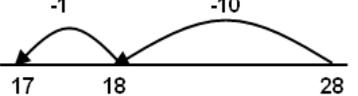

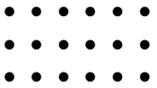

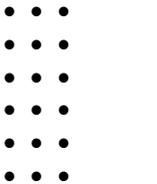

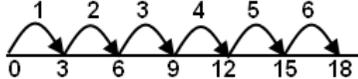

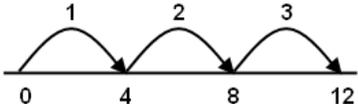

Progression in calculation – Use models and images; counting on and back in ones and tens; ordering numbers to 100; partitioning and recombining; addition and subtraction facts to 20; understanding addition and subtraction; understanding multiplication and division

Year Group-Reception	Addition	Subtraction	Multiplication	Division
<p>EYFS GOALS (4-9)</p> <p><u>Numbers as labels & for counting (problem solving, reasoning and numeracy)</u></p> <p>4. Writes number names in sequence, counting to, or backwards from, at least 10.</p> <p>5. Consistently recognises numerals in a range of contexts</p> <p>6. Counts up to 10 objects & counts out a specified number of things from a larger collection showing 1:1 correspondence</p> <p>7. Arranges in order a complete set of numbers fro 1-20</p> <p>8. Solve problems and challenges by applying mathematical ideas and methods i.e. missing no, grouping, sharing and estimating</p> <p>9. Has a secure understanding of numbers to 20, counting writing and recognising writing numbers accurately</p> <p><u>Calculating (problem solving reasoning and numeracy)</u></p> <p>4. Finds how many in two groups by combing and counting</p> <p>5. Using everyday objects, able to say how many are left after, say, eating, taking away or hiding, by counting those left</p> <p>6. In practical contexts understanding and begins to use vocabulary involved in addition and subtraction, such as 'add', 'take away', 'altogether', 'how many' etc</p> <p>7. Finds one more or fewer in practical contexts. Can talk about 'more' or 'less'.</p> <p>8. Explores & solves practical problems such as doubling, halving, grouping & sharing, using own methods</p> <p>9. Uses a range of strategies for addition and subtraction; displays mental recall of some addition and subtraction facts including doubles and pairs numbers that total 10</p>	<p>Find 1 more or 1 less than a number from 1 to 10</p> <p>Add together</p> <p>Drawing objects</p> <p>Counting on</p> <p>Introduction to + sign</p> <p>Vocabulary: add, plus, equals, is, altogether (verbal)</p> <p>High attainers record 'more'</p> <p>Separate (partition) a given number of objects into two groups.</p> <p>Select two groups of objects to make a given total.</p> <p>Number songs and rhymes. Tallying/mark making</p>	<p>Find 1 more or 1 less than a number from 1 to 10</p> <p>Take away practically</p> <p>Number track provided 0-10</p> <p>Drawing</p> <p>Number line provided 0-20</p> <p>Encourage recording on the number line</p> <p>'Less'</p> <p>Begin to relate subtraction to 'taking away' and counting how many are left.</p> <p>Say how many are left when some are taken away, by counting back from the number</p> <p>Find out by counting up how many more will make a given number.</p> <p>Number songs and rhymes</p>	<p>Counting in 2s and 10s</p> <p>Using number line to count in 2</p> <p>Number patterns on a 100 square</p>	<p>Sharing, grouping</p>
<p>Counting: Doubling and halving</p> <p>Use vocabulary such as:</p> <p>Double, half, halve, part</p> <ul style="list-style-type: none"> • How many shoelace holes are there? • How many slices of bread do we need to make 4 whole sandwiches for the café? • How many eggs will fill this box? • Can you cut the cake in half? How many pieces? • Fill half the tarts with strawberry jam and half with lemon curd. • How many cakes in the box? Take half of them out. How many are left? • Put half of: the cows in the field, cars in the garage, bears in the forest etc • How many pairs of socks are there in the laundrette? Are there any left over? • Find a partner. How any children are there? How many pairs? <p>Counting: repeated addition, grouping or sharing</p> <p>Use vocabulary such as: share, group, left over, how many times?</p> <ul style="list-style-type: none"> • How many wheels do we need for these three lego cars? • How should we plant the daffodil bulbs in these three pots? • Is there a way of doing it so that they all have the same number? Are there any left over? • Count out these stickers round the circle of children? How many times will they go round? Are there any left over? • Can we share out these cakes fairly? How shall we do it? 				
<p>Recording for a purpose (informal)</p>				

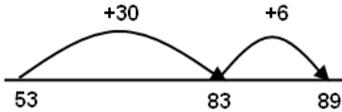

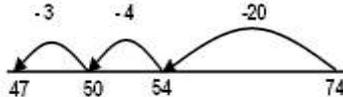

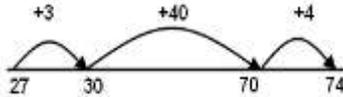

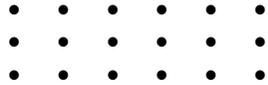

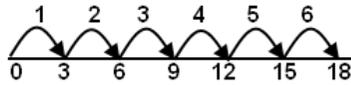

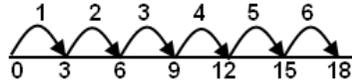

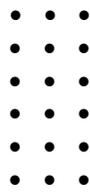

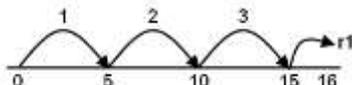

Progression in calculation – Use models and images; counting on and back in ones and tens; ordering numbers to 100; partitioning and recombining; addition and subtraction facts to 20; understanding addition and subtraction; understanding multiplication and division

Year Group -One	Addition	Subtraction	Multiplication	Division
<p>PRIMARY FRAMEWORK OBJECTIVES:</p> <p><u>Counting and understanding number</u> -Count reliably at least 20 objects, recognising that when rearranged the number of objects stays the same, estimate a number of objects that can be checked by counting - Compare and order numbers using the related vocabulary, use the =sign -Read, write and order numbers from 0-20; & then beyond; use place value to position numbers on no track or no line. -Say the no that is 1 more or less than any given no & 10 more or less for x 10</p> <p><u>Knowing and using number facts</u> -Derive and recall all pairs of numbers with a total of 10 & + facts for totals to at least 5; work out corresponding - facts -Count on and back in 1s, 2s, 5s and 10s & use this knowledge to derive multiples of 2, 5, 10 to x 10 -Recall the doubles of all nos to at least 10</p> <p><u>Calculating</u> -Relate addition to counting on; recognise that addition can be done in any order, use practical and informal written methods to support the addition of a 1-digit no or a multiple of 10 to a 1-digit or 2-digit no. -Understand subtraction as 'take away' and find a 'difference' by counting up; use practical and informal written methods to support the addition of a 1-digit no or a multiple of 10 to a 1-digit or 2-digit no. - Solve practical problems that involve combining groups of 2,5,10 or sharing into equal groups -Use vocab related to +/- and symbols to describe & record +/- no sentences.</p> <p><u>Using and applying mathematics</u> - Solve problems involving +/- doubling or halving in different contexts.</p>	<p>Strategies/knowledge Recording for a purpose. Beginning to use symbols +, = and numbers to record number sentences. Use knowledge that addition can be done in any order. Put larger number first in order to count on. Put number in head and count on Add pairs with a total of 10 Begin to partition and recombine by breaking units of 6, 7, 8, 9 into 5 and a bit e.g. work out mentally that $5+8 = 5 + (5 \text{ and } 3)$ $= 5 + 5 + 3$ $= 10 + 3$ $= 13$</p>  <p>Identifying near doubles Recording Empty box with numbers as above Adding 3 digits e.g. $3 + 4 + 2 = \square$ $3p + \square + 1p = 8p$ Using a completed number line or track to count on</p>  <p>Using empty number line to count on.</p>  <p>Addition and subtraction facts to 10 and then 20.</p>	<p>Strategies/knowledge Recording and using signs – and = Number line 0-30 Encourage recording on number line. Put number in head and count back. Count back from the largest number. Count on to find the difference Recording Symbolic representations: How many less?</p>  <p>Leading to empty box as above with numerals Ensure understand they put the largest number to subtract/take away.</p> $10 - 3 = \square$ $10 - \square = 6$ Using a completed number line (or number track) to count back $7-3 = 4$  <p>$8 - 3 = 5$</p>  <p>Addition and subtraction facts to 10 and then 20.</p>	<p>Strategies/knowledge Counting in 2s, 10s and 5s Doubling of numbers to 10 Repeated addition Recognise odd and even numbers. Rhymes and stories which involve counting in 2s or 5s. Use of money counting in 2ps, 5ps, 10ps. Recording Initially pictorially $2 + 2 + 2 + 2 = 8$ $2 \times 4 = 8$ 4 groups of 2 = 8 2 multiplied four times 2 groups of 3: using story sentences e.g. 2 bags with 3 apples each, practical activities</p> <p>column x row</p>  <p>4×2</p> <p>Number tracks & lines. Grouping objects pictorially</p>	<p>Strategies/knowledge Halving of numbers to 10. Counting patterns and equal groups. Repeated subtraction. Counting forwards and backwards in different intervals.</p> <p>Recording How many groups of 2 in 6? $\bullet \bullet \bullet \bullet = 3$</p> <p>Recording pictorially using concrete objects.</p> <p>Partitioning sets</p>

Progression in calculation – Use models and images ;counting on and back in ones and tens; ordering numbers to 100; partitioning and recombining; addition and subtraction facts to 20; understanding addition and subtraction; understanding multiplication and division

Year Group -Two	Addition	Subtraction	Multiplication	Division
<p>PRIMARY FRAMEWORK OBJECTIVES:</p> <p><u>Counting and understanding number</u> - Read and write 2-3 digit nos in figures & words; describe and extend no sequences and recognise odd & even nos. - Count up to 100 objects by grouping them and counting 10s, 5s or 2s, explain what each digit in a 2-digit no represents, including nos where 0 is a place holder, partition 2-digit nos in dif ways, inc. into multiples of 10/1 - Order 2-digit nos & position them on a no line; use > / < signs - Estimate a no of objects & round 2-digit nos to the nearest 10</p> <p><u>Knowing and using number facts</u> - Derive & recall all + & - facts for each no to at least 10, all pairs with totals to 20 & all pairs of multiples of 10 with totals up to 100 - Understand halving is inverse of doubling & derive & recall doubles of all nos to 20 & corresp. halves - Derive & recall x facts for the 2,5,10 tables & related division facts, recog multiples of 2,5,10 at least 100; - Use knowledge of number facts and operations to estimate and check calculations</p> <p><u>Calculating</u> - +/- mentally a single digit no or a multiple of 10 to or from any 2-digit no, use practical & informal written methods to +/- 2 digit nos. - Understand that – is the inverse of + & vice versa & use this to derive & record related +/- no sentences. - Use the symbols +/-x/÷ & = to record & interpret no sentences involving all 4 ops, calculate the value of an unknown in a no sentence e.g. $30 - \square = 24$, $\square \div 2 = 6$ - Represent repeated + & arrays as x & sharing & repeated - (grouping) as ÷ ; use practical & informal methods & related vocab to support x & ÷, inc calcs with remainders</p> <p><u>Using and Applying mathematics</u> - Solve problems involving +/-x/÷ in dif contexts.</p>	<p>Strategies/knowledge Range: Nos. 0-100 Adding several numbers Addition bonds for all numbers to 10 then 100 Largest number first. Focus on place value. Partition into 100s, 10s and units Draw own number line Add 3 numbers by using strategies such as: look for pairs that make 10, start with largest number. Work out mentally questions like: $2 + 7 + 4 =$ $1 + 9 + 5 =$ Identify near doubles by using doubles already known e.g. $40+39 =$ (double 40 take away 1) Recognise symbol such as Δ to stand for unknown number</p> <p>Recording Adding 9 by adding 10 & adjusting</p>  <p>Solve number problems using conventional signs and symbols Develop children's own recording in the context of practical work and explaining how problems were solved Using a number line or number grid to count on in 1s or 10s (or in head)</p> <p>$46+3 = 49$</p>  <p>$46+10$</p> 	<p>Strategies/knowledge Range: Nos. 0-100 use number line Take away Subtract Difference between How many more? Find a small difference by counting up Subtract 2, 2 digit numbers Subtract 'teens' numbers from 2 digit number</p> <p>Recording Empty number box problems $10 - 7 = \square$ $10 - \square = 3$ Subtract 9 by subtracting 10 and adjusting leading to subtract 19 Partition numbers into tens and units on a blank number line</p> <p>$28 - 17 = 11$</p>  <p>Use an empty number line to count on/back to find the difference.</p> <p>$28 - 17 = 11$</p>  	<p>Strategies/knowledge Counting in 2s,3s, 5s, 10s Doubles Understand as repeated addition Times/multiply Use 'x' sign in number sentences</p> <p>Recording Introduce arrays as a form of recording Number in column times number in row $6 \times 3 =$ $c \times r$</p>  <p>$3 \times 6 =$ $c \times r$</p>  <p>Multiplication as repeated addition using blank number line</p> <p>$6 \times 3 = 18$</p> 	<p>Strategies/knowledge Understand ÷ as sharing equally Understand ÷ as grouping</p> <p>Use ÷ sign in number sentences</p> <p>Recording Sharing 12 sweets between 4 How many do each have12?</p>  <p>Division as grouping How many 4s make 12 (using blank number line)</p> <p>$12 \div 4 = 3$</p> 

Progression in calculation – Use models and images; counting on and back in ones and tens; ordering numbers to 100; partitioning and recombining; addition and subtraction facts to 20; understanding addition and subtraction; understanding multiplication and division

Year Group - THREE	Addition	Subtraction	Multiplication	Division						
<p>PRIMARY FRAMEWORK OBJECTIVES:</p> <p><u>Counting and understanding number</u> - Read write & order whole numbers to at least 1000 & position them on a no line; count on & back to 0 in single-digit steps or multiples of 10. - Partition 3-digit numbers into multiples of 100, 10 & 1 in different ways - Round 2 or 3 digit nos to the nearest 10 or 100 & give estimates for their sums & differences.</p> <p><u>Knowing and using number facts</u> - Derive & recall all +/- facts for each no to 20, sums & differences of multiples of 10 & pairs that total 100 - Derive & recall x facts for 2-6 & 10 & corresponding ÷ facts, recognise x of 2,5 or 10 up to 1000 - Use knowledge of no ops & corresponding inverses, including doubling & halving to estimate & check</p> <p><u>Calculating</u> - +/- mentally combinations of 1-digit & 2-digit numbers - Develop & use written methods to record, support or explain +/- of 2 & 3 digit numbers - Multiply one & two digit numbers by 10 or 100 & describe effect - Use practical & informal written methods to support x/÷ of 2-digit, round remainders up or down - understand that ÷ reverses x & vice versa & use to derive & record related x & ÷ no sentences</p> <p><u>Using and Applying mathematics</u> - Solve 1 & 2 step problems in a variety of contexts choosing appropriate calculations.</p>	<p>Strategies/knowledge Put largest number first Add several numbers Place value for 2, 3, and 4 digit numbers Identify near doubles Bridge through multiples of 10 and adjust Recognise addition as the inverse of subtraction.</p> <p>Recording Empty number boxes with missing numbers in all three positions e.g. $34 + 5 = \square$ $34 + \square = 39$ $\square + 5 = 39$ partition into tens and ones and recombine on number line $36 + 53 = 53 + 30 + 6$</p>  <p>Add by partitioning $342 + 234 = 576$ $300 + 200 = 500$ $40 + 30 = 70$ $2 + 4 = 6$</p> <p>When ready move to expanded written methods Know how to set out in columns</p> $\begin{array}{r} 625 \\ +48 \\ \hline 673 \end{array}$ <p>$13 \quad 5 + 8$ $60 \quad 20 + 40$ $600 \quad 600 + 0$ 673</p>	<p>Strategies/knowledge Add and subtract mentally a near multiple of 10 to or from a two digit number i.e. $284 - 9 = 275$ $284 - 10 + 1$ Recognise that when 2 numbers are close together it is easier to count up to find the difference.</p> <p>Recording Using an empty number line to count on or back to subtract.</p> <p>Counting back; partition the second number to support counting back in stages</p> $74 - 27 = 47$ $74 - (20 + 4 + 3)$  <p>(counting on)</p>  <p>Expanded method leading to adjusting</p> $\begin{array}{r} 600 \quad 140 \quad 14 \\ 700 \quad 50 \quad 4 \\ - \quad 80 \quad 6 \\ \hline 600 \quad 60 \quad 8 \end{array}$	<p>Strategies/knowledge Use knowledge of no facts and place value to x/÷ by 2, 3, 4, 5, 6, 10. Use doubling and halving Multiplication can be done in any order Recognise as inverse of division. As scaling up getting X times bigger</p> <p>Recording Continue to use arrays as a form or recording $6 \times 3 =$</p>  <p>Multiplication as repeated addition (using blank number line)</p> $6 \times 3 = 18$  <p>Move to grid method TU x U</p> 23×8 <table border="1" data-bbox="1413 1230 1621 1305"> <tr> <td>x</td> <td>20</td> <td>3</td> </tr> <tr> <td>8</td> <td>160</td> <td>24</td> </tr> </table> <p>$160 + 24 = 184$</p>	x	20	3	8	160	24	<p>Strategies/knowledge Introduce remainders Recognition of sign Understand as sharing or grouping Recognise as inverse of multiplication</p> <p>Recording Division grouping (using a blank number line) Counting up on number line</p> $18 \div 3 = 6$  <p>or sharing 18 shared between 3</p> $18 \div 3 =$  <p>Finding remainders after division</p>  <p>$16 \div 5 = 3r1$</p>
